This is Julia Eickmeier. I am currently at Alton IL Mental health Facility. They are abusing me in here. They have added poisons to my food on several occasions. I came from Ottawa Illinois, LaSalle County Correctional Facility. They went ahead with murderous protocols on me there. They have added cianide, acid and other poisons to the food here for me on October 27 & 29th. They seem to have accepted money from the people at the LaSalle County Correctional Facility to follow through with murdering me.

They added cianide, acid and other poisons to my food and water and air there as well. This was an attempt to murder me for a higher up who thought they would get in trouble because of another court case. The authorities there are extremely unprofessional and they shouldnt be hiring another facility's personell to kill me. These workers here have accepted their bargain deal. They have attempted to murder me here at the Alton Illinois Mental Health Care Facility.

The case should be transferred from Northern F.B.I, to the South on the grounds that the Northern F.B.I Reigon have neglected handling the case before and the Southern Illinois F.B.I. would be more suitable to handle the case at this time.

There are huge errors on the Judges part that she made on my behalf. She persistently prosecuted the wrong case, bringing a child into the case when there did not need to be one. The child is named "Connor Le Robbins" in the civil case 15-F-153 and she went without proper legal counsel for a long time. She's apparently being raped by they and their friends who are police officers. They've taken it upon themselves to kill me due to their actions toward

her in this other case and their friends have tried to help them get away with it when I was at the County Jail. Due to this conflict of interest, I've needed a case transfer for a long time. A case transfer right now would be ideal. I'm not trying to end my life over this matter as I value my life and see nothing wrong with what they're doing to her or what the father's allowed to happen to her since I've been out of her life. She deserves a mom in her life who's life isn't in danger because of how they aim to treat me because of what they're doing. Please find sympathy in your heart to save my life and put a stop to this madness. Please and Thank you very much

Assauged,
Julia Eickmeier
